Skills

Frontend: Next.js, React, TypeScript, React Query, Tanstack, Zustand, Tailwind CSS, Framer Motion

Backend / DevOps: FastAPI, Express, NestJS, Postgres, Redis, Docker, AWS (ECS, AppRunner, EC2, S3, SES, CloudFront, Route 53), DigitalOcean, GitHub Actions

AI / LLM: Anthropic SDK, OpenAI SDK, LangChain, Inngest, tool-calling pipelines, RAG, Vapi, ElevenLabs

Professional Experience

Nov 2024 – Present
Dublin, Ireland

Software Engineer, ArtisAI

- Cognistream (cognistream.ai): Built the Next.js frontend for an AI-moderated voice research platform. Contributed across the FastAPI + Inngest + LangChain backend.
- EVE Mobility: Fullstack work on an EV/ICE fleet management and analytics platform.
- Kapp Sailing (kappsailing.com): Helped build the frontend and app in Angular and Expo.
- Voice product MVPs integrations using Vapi and Hume.
- Social media analytics integrations across TikTok / Instagram / LinkedIn APIs.

Turku, Finland (Remote)

Frontend Engineer, Resimator Oy

- Converted UI designs to code for the company landing page (Next.js / Tailwind).
- Implemented GraphQL integration with Strapi CMS for dynamic content.
- Built smooth animations and transitions using Framer Motion.
- Developed frontend architecture for a webshop with Next.js, Tailwind, and Ant Design.

Feb 2024 – Nov 2024
Crystal Lake Illinois, US

Software Engineer, ASIT Capital

- Contributed to the frontend of the main company website (a5it.com) and product (a5sync.com).
- Deployed and maintained NestJS, Express, FastAPI, and Next.js applications across AWS, DigitalOcean, and Doppler.

Aug 2023 – Feb 2024
Wilmington, Delaware, US,
(Full Time)

Software Engineer, Hyperce LLC

- Deployed and maintained 15–20 projects on AWS; orchestrated deployments on ECS, AppRunner, and EC2.
- Configured and managed AWS services including SES, S3, CloudFront, and Route 53.
- Developed the company website using Next.js with responsive design.

Projects

Ryuk AI

A conversational analytics layer for any Postgres or MySQL database. Built solo, end-to-end. Stack: Next.js, FastAPI, Postgres, Inngest, and Anthropic's API with prompt caching.

- Plug in your database, ask questions in plain English, and get back validated SQL queries, charts, and dashboards; with the agent's reasoning visible step-by-step.
- Designed around real-world safety constraints: read-only access, query timeouts, and guards against destructive or malformed SQL before anything runs.

AIPrep, Educational Video Generation

- AI study tool that turns student questions and textbook images into 30-second to 2-minute animated video explanations with audio narration.
- Built with Manim for animation, LLM-driven script generation, and ElevenLabs for voice. Multilingual (Hindi, English, Hinglish + 14 languages total), aligned to the Indian curriculum.

Education

2022 – 2023
Kathmandu, Nepal

NEB 12 (High School), Nobel Academy

Physics, Chemistry, Mathematics, Computer Science
